

Wyszukiwanie informacji o publikacjach, wskaźnikach bibliometrycznych w bazach Web of Science, Scopus

Na wybranych przykładach:

- Autora
- Czasopisma
- Instytucji

Można założyć – że efektywna aktywność publikacyjna związana jest z zauważeniem i ewentualną dalszą dyskusją dotyczącą opublikowanych wyników prowadzonych badań, co znajduje także swoje przełożenie we wskaźnikach bibliometrycznych.

Dalsza dyskusja na temat prezentowanych wyników badań naukowych, może odbywać się np. poprzez zacytowanie publikacji. Brak jest jednolitego zasobu gromadzącego cały dorobek naukowy. Z uwagi na jego rozproszenie jest konieczność sięgania do wielu baz.

Niniejsza prezentacja wskaże narzędzia wyszukiwania informacji o dorobku publikacyjnym, czasopiśmie, wskaźnikach Impact Factor (IF) profilu autora, instytucji:

- Web of Science CC_Clarivate Analytics
- Scopus_Elsevier
- Journal Citation Report (JCR)

Otrzymane wyniki w każdej z baz będą inne z uwagi na inną liczbę indeksowanych czasopism, a tym samym publikacji danego autora.

Abstract

The present study applied two theoretical frameworks (the demands-control-support model and the conservation of resources model) to investigate associations between job demands, job burnout, and counterproductive work behaviors (CWB) in the context of social support and job control. Data were collected among 625 police officers. Moderated mediation analysis showed that high job demands were indirectly related to high CWB, with job burnout acting as the mediator. These indirect effects were moderated by work-related resources (social support and job control). Job demands were associated with higher job burnout when social support was low. High job burnout was related to more frequent CWB when support was low and control was high. Finally, the job

1 Evaluating Predictors and Outcomes of Emotional Exhaustion and Depersonalization for Women Officers

Schuck, AM and Rabe-Hemp, CE

Jul 2023 (Early Access) | WOMEN & CRIMINAL JUSTICE

98

References

The purpose of this study is to examine the predictors and consequences of two dimensions of burnout, emotional exhaustion, and depersonalization, among 1,531 women officers serving in 83 law enforcement agencies. Studying burnout is vital to building support systems that can help women thrive in law enforcement. The findings show that a substantial number of women officers experience exhaustio ... Show more

Journal Impact Factor ⓘ

The Journal Impact Factor (JIF) is a journal-level metric calculated from data indexed in the Web of Science Core Collection. It shows publication and citations characteristics of the subject area and type of journal. The Journal Impact Factor can complement expert use a journal-level metric as a proxy measure for individual researchers, institutions, or articles. [Learn more](#)
