Preface	5
Chapter 1. Acoustic anechoic termination of the waveguide in the measuring system of ducted silencers <i>Andrzej Dobrucki, Przemysław Plaskota, Romuald Bolejko</i>	7
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Dobrucki_A_Plaskota_P_Bolejko_R	
Chapter 2. The use of directional transducers to reduce exposure to noise <i>Grzegorz Makarewicz, Leszek Morzyński, Dariusz Pleban</i>	17
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Makarewicz_G_Morzynski_L_Pleban_D	
Chapter 3. Review of evaluation criteria for infrasound and low frequency noise in the general environment <i>Małgorzata Pawlaczyk-Łuszczynska, Adam Dudarewicz</i>	30
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Pawlaczyk-Luszczynska_M_Dudarewicz_A	
Chapter 4. The risk of musicians' high sound exposure during performances of classical music <i>Agnieszka Paula Pietrzak, Jan Żera</i>	52
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Pietrzak_A_Zera_J	
Chapter 5. Assessment of noise annoyance in medical facilities <i>Dariusz Pleban</i>	57
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Pleban_D	
Chapter 6. Visualizations of sound behind the space-coiling metamaterial <i>Grzegorz Szczepański, Adam Swidziński, Leszek Morzyński</i>	69
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Szczepanski_G_Swidzinski_A_Morzynski_L	
Chapter 7. The concept of vibration isolation with variable stiffness with the use of magnetic elements <i>Jan Adamczyk, Jan Targosz, Jarosław Bednarz</i>	77
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Adamczyk_J_Targosz_J_Bednarz_J	
Chapter 8. Use of tuned mass dampers (TMD) to reduce vibrations caused by wind on the spire of a tower building <i>Wiesław Fiebig, Christian Meinhardt</i>	85
DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Fiebig_W_Meinhardt_C	

Chapter 9.		
	Evaluation method of hand-arm vibration using high-speed camera	
	<i>Piotr Kowalski, Jacek Zajac</i>	96
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Kowalski_P_Zajac_J_Evaluation	
Chapter 10.		
	Sensitivity and response to temperature changes of selected smart materials	
	<i>Piotr Kowalski, Jacek Zajac</i>	108
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Kowalski_P_Zajac_J_Sensitivity	
Chapter 11.		
	Selection of the vibration impact estimation parameter for environmental assessments	
	<i>Piotr Stecz</i>	116
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Stecz_P	
Chapter 12.		
	Vibration transmissibility of resilient materials when loaded by a simulating mass and when gripped by the operator's hand	
	<i>Jacek Zajac, Piotr Kowalski</i>	128
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Zajac_J_Kowalski_P_Vibration	
Chapter 13.		
	Whole-body vibration hazard at workstations associated with the processing of mineral raw materials	
	<i>Jacek Zajac, Piotr Kowalski</i>	137
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Zajac_J_Kowalski_P_Whole-body	
Chapter 14.		
	Tests of gloves intended for protection against vibration according to EN ISO 10819:2013	
	<i>Jacek Zajac, Piotr Kowalski, Małgorzata Rejman</i>	146
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Zajac_J_Kowalski_P_Rejman_M	
Chapter 15.		
	Polish acoustics based on bibliometric analysis for 2017-2021	
	<i>Witold Sygocki</i>	156
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Sygocki_W	
Chapter 16.		
	Speech perception by level-dependent hearing protectors users in impulse noise conditions	
	<i>Rafał Mlynski, Emil Kozłowski</i>	176
	DOI: 10.54215/Noise_Control_2022_A_Digital_Monograph_Mlynski_R_Kozlowski_E
